

WIPER BLADES

SEE **FURTHER**  
WITH **HELLA**

---

HELLA is a listed, internationally positioned automotive supplier operating under the umbrella brand FORVIA. Within this de facto group, HELLA stands for high-performance lighting technology and automotive electronics. At the same time, the company covers a broad service and product portfolio for the spare parts and workshop business as well as for manufacturers of special-purpose vehicles with its Lifecycle Solutions business group.

## GOOD VISIBILITY EQUALS SAFETY WIPER BLADES FOR PASSENGER CARS

No matter whether you only drive occasionally or are constantly on the road: it is vital to see the road clearly. High-quality wiper blades are therefore essential. They do an excellent job of cleaning the windshield of the car and are designed to keep aggravating wind noise to a minimum.

The right wiper for every model! HELLA offers wiper blades for almost every vehicle model. HELLA wiper blades can be fitted to newer model series as well as many older vehicles. In addition to offering conventional wiper blades, HELLA has non-articulated DynaBlade wiper blades and rear wiper blades in its product portfolio. All HELLA wiper blades are long lasting, durable and feature a wear-free leading edge. Thanks to the graphite nano coating of the rubber lip, the blades glide smoothly and predictably over the glass surface.

## HIGH LEVEL OF COMFORT FOR LONG-DISTANCE DRIVERS

### WIPER BLADES FOR TRUCKS

Squeaky or chattering windshield wipers can make driving difficult, especially if you drive every day. HELLA wiper blades are a trustworthy partner you can always rely on, including in extreme situations.

They operate reliably and provide you with a clear forward view, even if severe weather with snow and ice prevails. This not only improves driving comfort, but also safety. HELLA offers wiper blades in flexible lengths for almost every model of commercial vehicle.

# EXPERIENCE THE DIFFERENCE WITH **HELLA WIPER BLADE**

 Wiper blade for passenger Vehicle Application

## Universal Series

- Nanotechnology graphite-coated rubber blade provides smooth and quiet operation with clear visibility.
- Contact points with even downward pressure, delivering a clean wipe at every point

## Cleantech Series

- Thermoplastic-weatherability spoiler for UV resistance.
- OE specific ingredient compound rubber with graphite coated for superior wiping performance in all seasons
- Aerodynamic structure can prevent downward airflow pressure causing wind-lift
- Stainless steel flexor maintain the best elasticity in any condition

## Hybrid Series (Razor)

- Advanced hybrid technology that integrates the best design features of conventional frame and flat blade for an ideal combination of styling, performance and protection.
- Innovative aerodynamic design offers enhanced contact with the windshield and optimal pressure distribution across the blade to deliver a cleaner wipe.
- Improved durability and reliability with a thicker graphite-coated rubber to withstand greater operation stress

## HELLA Wiper Blade Universal Series

Hella Wiper Blades are made with top quality nano technology graphite-coated rubber. The graphite coating greatly reduces friction in the contact areas between the blade and the windscreen. This means a smooth and quiet operation with longer-lasting performance.

Hella Wiper Blades are subjected to the highest quality requirements and meet the stringent test standards of Japanese Industrial Standards (JIS) and Society of Automotive Engineers (SAE).

### Features

#### Premium Wiping Performance

- Nanotechnology graphite-coated rubber blade provides smooth and quiet operation with clear visibility.
- Contact points with even downward pressure, delivering a clean wipe at every point.

#### Easy-to-use, Universally Compatible Adaptors

- Pre-attached with the adaptor with the most vehicle applications
- Comes with universal adaptors that fit over 95% of vehicles in Asia.

#### Durable

- Wear-resistant edge gives perfect results up to the time of replacement.
- Superior solid steel frame ensures maximum strength and durability.

## HELLA Wiper Blade Cleantech Series

HELLA Cleantech wiper blades give the windshield a top-quality cleaning. This is ensured by their aerodynamic design. The design results in a uniform distribution of forces on the windshield, which minimizes the formation of streaks. Furthermore, the aerodynamic design reduces the wind uplift, thereby reducing the wind noise as well.

In addition, the rubber of the wiper blades consists of an OEM-specific composition and is also coated with graphite. This guarantees not only smooth and quiet operation, but also a longer service life.

### Features

#### Long Lasting Wiping Performance

- OE specific ingredient compound with graphite coated for superior wiping performance in all seasons

#### Durable

- Robust spoiler to withstand extreme weather condition.
- Stainless steel flexor maintain the best elasticity in any condition
- Pressure point can share the pressure more even.

#### Multiple Adaptors

- Includes multiple adaptors for maximum vehicle coverage.

## HELLA Wiper Blade Razor Hybrid Series

HELLA Razor wiper blade offers car drivers an upgrade to better wiping performance. Designed with an advanced hybrid technology, HELLA Razor integrates the best features of conventional frame and flat blade for an ideal combination of style, performance and protection. Its innovative aerodynamic design offers enhanced contact with the windscreen and optimal pressure distribution across the blade to deliver a cleaner wipe.

### Features

#### Advance Hybrid Technology

- A crossover in wiper blade technology design that combines structural features of the conventional frame and the flat blade low profile design.

#### Easy-to-use, Universally Compatible Pre-attached Adaptors

- The pre-attached adaptor offers hassle-free and easy installation.
- Fits more than 95% of vehicles in Asia.

#### Aerodynamic Design

- Improved aerodynamics, resulting in a smoother and quieter operation with maximum visibility and safety
- Optimal downward air-flow pressure provides better contact and prevents wind lift at high speeds.

#### Maximum Durability & Reliability

- Thick nano technology graphite-coated rubber to withstand greater operation stress.
- All-weather protective shell gives added protection for a longer life.

## HELLA Wiper Blade Commercial Series

Wiper Blades for Commercial Vehicles HELLA Wiper Blades for commercial vehicles are specially formulated using top quality nano technology graphite-coated rubber. The blades come with a thicker width which allows them to withstand the additional stress of heavy commercial usage.

### Features

#### Long Lasting Wiping Performance

- Nanotechnology graphite-coated rubber blade provides smooth operation with minimal friction on the contact areas.
- Multiple contact points with even downward pressure, delivering a clean wipe at every points.

#### Durable

- Heavy duty steel frame and design ensure maximum stability and durability.
- Thicker rubber width up to 9mm, capable of withstanding the additional stress of heavy commercial usage.
- Glossy surface powder coating for all weather protection

#### Multiple Adaptors

- Includes multiple adaptors for maximum vehicle coverage.
